

Polling for *Policy Exchange* GB Ethnicity Poll

5 April 2024
London, UK

REDFIELD & WILTON
STRATEGIES

Methodology

Conducted By: Redfield & Wilton Strategies

On Behalf Of: *Policy Exchange*

Fieldwork Date: 24 March – 1 April 2024

Population Sampled: Eligible Voters in Great Britain belonging to the following ethnic groups:

(Black): Caribbean (200), African (200)

(Asian): Bangladeshi (200), Chinese (200), Indian (200), Pakistani (200)

(Mixed): White and Asian, White and Black African, White and Black Caribbean, Other (200 combined total)

Sample Sizes: 200 of each ethnic group

Weighting: Samples are *unweighted*

Margin of Error: Because only a subset of the overall population of eligible voters in Great Britain was surveyed for this research, all results are subject to a margin of error. By consequence, not all differences are statistically significant, *especially among subsamples*.

In this poll, if 50.0% of respondents in any ethnic subsample of 200 respondents gave a particular answer to a question—the worst-case scenario from the perspective of margin of error—it is 95.0% certain that the *true* value falls within a 6.92% range from the sample result.

Subsample results from crosstabs are subject to a higher margin of error due to their lower sample sizes. Conclusions drawn from small subsamples should be treated with caution. *We particularly emphasise caution when reporting on any subsample figures where the base is below 100 respondents.*

Full Results

The next General Election is due to take place sometime before January 2025. If the Labour Party wins the next General Election, do you think your life overall will become better or worse than it is now?

	Caribbean	African	Bangladeshi	Chinese	Indian	Pakistani	Mixed
